

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

SOME PRINCIPLES OF MUSEUM ADMINISTRATION

CONTENTS

- Some Principles of Museum Administration:*
PROFESSOR FRANZ BOAS 921

Scientific Books:—

- The Collected Works of George William Hill:* E. W. B. *Pocket-book of Aeronautics:* PROFESSOR A. LAWRENCE ROTCH 933

Societies and Academies:—

- Northeastern Section of the American Chemical Society:* PROFESSOR FRANK H. THORP. *The Torrey Botanical Club:* DR. C. STUART GAGER 937

Discussion and Correspondence:—

- Elimination or First Species:* PROFESSOR J. S. KINGSLEY. *A Correction:* PROFESSOR O. LOEW 939

Special Articles:—

- The Behavior of the Seedlings of Certain Violet Hybrids:* PRESIDENT EZRA BRAINERD. *Formulas for the Comparison of Astronomical Photographs:* PROFESSOR HAROLD JACOBY 940

Current Notes on Land Forms:—

- Upwarped Mountains in Alaska:* I. B. *The Wolds and Vales of Belted Coastal Plains:* W. M. D. *Southern Arkansas and Northern Louisiana:* W. M. D. 946

- The Bicentenary of Linnæus* 949

- Scientific Notes and News* 949

- University and Educational News* 952

IN No. 641 of SCIENCE (April 12, 1907) Dr. George A. Dorsey discusses in some detail the installation of the ethnological collections in the American Museum of Natural History, basing his criticism essentially on the point of view that the arrangement is an unsatisfactory attempt at popularizing the results of ethnological research. In his discussion he assumes that the essential object of a large museum must be research, not instruction, without, however, discussing the validity of this fundamental assumption.

I may be allowed in the following remarks to discuss what seems to me the vital question of the uses of museums as research institutions and as educational institutions. Since my own practical experience has largely been gained in ethnographical museums, I may be allowed to take my examples particularly from these, indicating at the same time in what respects ethnological museums seem to differ from natural-history museums.

Museums may serve three objects. They may be institutions designed to furnish healthy entertainment, they may be intended for instruction and they may be intended for the promotion of research.

The value of the museum as a resort for popular entertainment must not be underrated, particularly in a large city, where every opportunity that is given to the people to employ their leisure time in healthy and stimulating surroundings

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.
